Date 11th September 1943. No. 1656

Continual

To

The Secretary to Government,
Development Department.

1925

Sir,

Sub: Empty Beer Bottles for Government Industrial and Testing Laboratory.

I have the honour to state that the General Manager, Government Industrial and Testing Laboratory reports that the Laboratory is in urgent need of empty beer bottles for filling medicines and supplying to the Medical and Veterinery Departments and that the stock of these bottles has gone down.

Quotations were called for by the General Manager and the quotation of one Mr. Sheid Ahmed is Rs.3-14-0 per doz. for a quantity of 300 doz. only and that of Messrs. M. Thangavelu Chettiar & Sons is Rs.4/- delivery at the Laboratory. The firms have stated that the quotations hold good only for 6 days from 9-8-1943. I have therefore permitted the General Manager in anticipation of Government sanction, to place orders for the entire quantity of 300 dozs. which Mr. Sheik Ahmed had and the balance with Messrs. M. Thangavelu Chettiar & Sons and to incur the expenditure of Rs.4,762-8-0 being the total cost of purchase of 100 gross of bottles. This will be met out from the revenue funds of the Laboratory.

I request that early sanction of the Government may kindly be obtained approving of the action taken by me.

I have the honour to be,
Sir,
Your most obedient servant,

Govt. Director,
Industrial Concerns.

Letter No. G. 967 dated, the 13th April, 1944 from the C. D., D. C. reporting that, in the circumstances explained, it is not desirable to take up the manufacture of the bottles at the Indust! & Testing Laboratory.

The C. D., D. C. states that the bottles required by the D. T. C may be obtained from Messrs. the Mysore Glass & Enamel Works, Ltd, to whom any required facilities may be given if necessary to take up the manufacture of the bottles. This question may perhaps be pursued after orders are issued on the proposal of the C. D., D. C for the purchase of the bottles.

S/ Subº for orders. Refº para 4 on the previous page.

To

The Director General of Supply

24/4

The action taken by the Director in transmitting the placing of orders for the bottles may be approved.

In the circumstances explained, the question of the manufacture of bottles at the I. T. L. need not be pursued.

No. G.967
Encl. one sheet

Bangalore, dated 11th April, 1944.

To

The Secretary to Government,
Development Department,
Bangalore.

Sir,

No. 14 Re:- Empty Beer Bottle manufacture at the Industrial and Testing Laboratory.

====

With reference to your letter No.D.2924/I&C 7-43 dated 2nd November 1943 on the above subject, I have the honour to enclose herewith for the information of Government copies of letters Nos. 498 dated 6th December 1943 and 811 dated 7th April 1944 received from the General Manager, Industrial and Testing Laboratory in the matter.

In view of the manufacture of bottles being a highly specialised work with a technique of its own as stated by the General Manager and the need of beer bottles at the laboratory being limited, the General Manager is of the view that it is not desirable to take up the manufacture of the bottles at the Industrial and Testing Laboratory and the required supplies may be obtained from Messrs. The Mysore Glass & Enamel Works Ltd., to whom any required facilities may be given if necessary, for taking up the manufacture. I agree with his opinion. Sanction of Government for the purchases already reported to Government in this office letter No.G. 304 dated 11th September 1943 may kindly be obtained and communicated early.

I have the honour to be,
Sir,
Your most obedient servant,

Government Director,
Industrial Concerns.

=====

Subject:- Empty Beer Bottles for Government Industrial and Testing Laboratory.

=======

With reference to letter No.D.2924/I&C 7-43 of the 2nd November '43 from the Development Secretary to Government, I write to state as follows:-

Manufacture of bottles and other glass containers is a highly specialised work with a technique of its own. Even distilleries and breweries who consume enormous quantities of bottles do not generally have their own bottle manufactory, but prefer to buy the bottles from bottle manufacturers.

We should not ordinarily find any difficulty for getting our requirements of our containers in view of the proximity of Mysore Glass and Enamel Works which is a unique advantage we possess. Unfortunately sometimes, it so happens that this firm is short of moulds or coal. As far as possible we are getting the moulds made for them in the Government Electric Factory for the types of bottles we require. As regards the position of coal, a representation has already been made by them in this matter. Therefore I would submit that it would be better to give the Mysore Glass and Enamel Works the special facilities they require for supplying our needs rather than start a special branch for making bottles ourselves. The latter procedure might no doubt have been necessary if there were no bottle manufacturing company nearby. In this connection, I might say that the Management of Glass and Enamel Works have been most helpful and go out of their way to help us as far as possible. The original paper is resubmitted herewith.

Copy of note No.811 dated 7th April 1944 from the General Manager, Government Industrial & Testing Laboratory, to the Government Director, Industrial Concerns, Bangalore.

======

Re:- Manufacture of Beer Bottles for Government Industrial & Testing Laboratory.

Further to the report on the above subject already submitted to the Director, it may be added that the laboratory is makin; use of second-hand beer bottles for supplies to Government Medical Stores only. These bottles are manufactured solely for Breweries and the empties are collected by dealers in second-hand bottles. Good numbers are fairly readily available and are quite cheap compared with the cost of the usual Tincture bottles. Since the laboratory is endeavouring to supply the medicines to the Government Medical Stores at as low a price as possible, these beer bottles are being used to cut down the cost of containers.

Except for the purpose above mentioned, the laboratory cannot make use of these bottles for supplies to the General market. These bottles do not have the aesthetic appeal so essential in any trade. They are not of the standard sizes required by Drugs Trade. Even the colour and quality of glass are not what may be considered suitable. In fact the laboratory would prefer the usual one or two pound tincture bottles, which incidentally enables a "uniform packing" to be put on the market. It may, therefore, be stated that no special arrangements need be considered for the manufacture of Beer Bottles..

There are, however, many other types of glass bottles required by the laboratory, but are not readily obtainable at the present time. Messrs.The Glass and Enamel Works are helping the laboratory to a certai extent by manufacturing a few types for our specialities. They are producing these with the necessary moulds. They, however, require an

p.t.o

require an assurance of a regular and adequate supply of coal, after which they would be able to supply our requirements better.
